comprehensive toolkit of resources*

Multi award-winning study software hits Australia...

Since 2007, over **110,000 students** with disabilities have used Sonocent Audio Notetaker to study independently.

And now, for the first time, we're promoting the software across Australia.

Which is why we've created the Sonocent Connect Network - an accredited training and support programme open to the most trusted Disability Support Officers in the country.

*"Sonocent Audio Notetaker is **the missing piece of the technology jigsaw puzzle** in supporting learners to capture, process and manage audio information. The visual representation of the audio layer adds a tangible cognitive bridge to a transient modality. It promotes active listening comprehension and, ultimately, greater retention of learning."*

Jim Sprialis
Inclusive Technologies Expert
Director, Sprialis Consulting

Spaces now open on our upcoming training workshops

Attend a workshop to become a full member of the **Sonocent Connect Network** and one of a select band of Sonocent evangelists in Australia.

You will get hands-on with the software and the companion mobile apps. You will come away with a sound knowledge of Audio Notetaker and be able to create a clear plan for how it can help your students overcome their challenges with note taking and more. You will also be guided in how to articulate the benefits of the software to campus educators for capturing learning activities and creating flipped content.

Discover how the software enables students with disabilities to:

- Take comprehensive and effective notes with independence
- Develop a range of other core study skills
- Overcome their struggles with reading and writing

Discover how the accessibility features of the software:

- Engage students with multimodal information
- Provide a platform for greater independence in processing and comprehending multimodal information
- Support the construction of assignments in a range of modalities

Receive ongoing support as a member of the Sonocent Connect Network

After completing the training workshop you will be comprehensively supported with an extensive toolkit of accompanying training resources. And, of course, you can access ongoing support from Jim Sprialis and the Sonocent team.

You'll also receive a **free personal Sonocent Audio Notetaker licence** so that you can put the software through its paces, maintain your familiarity with its features and demonstrate the benefits of this unique and innovative solution to students and colleagues.

Plus, you'll be the first to hear about new product launches and will enjoy exclusive access to software updates at BETA stage.

How does Sonocent Audio Notetaker help students?

Our software enables students to independently take great notes by breaking the process down into manageable steps.

First the student records into the software using its visual workspace to highlight key audio information and break their recording up into sections as they listen.

Second, the student returns to their project after class, listening back to the key moments and creating summaries. They can also add slides, images and reference material right alongside the relevant parts of their recording.

The various elements of the resulting projects can be repurposed for a range of tasks including revision, essay composition and research.

90% of students* are confident that the notes they take with our software will help them study

*Statistic from a 2015 survey of 1,624 users with Sonocent Audio Notetaker licences

For information about the **Sonocent Connect Network** and to book into a training workshop, contact our Australian super-user and trainer, **Jim Sprialis**

Jim has been an educator for 28 years in the inclusive education and technology arena. Over the past decade, he has managed the internationally recognised South Australian Education Department's Inclusive Technology Service. Jim now runs his own nationwide consultancy and offers expert advice, training and support to schools, the tertiary sector and workplaces. With a specialist knowledge base around disability and learning difficulties such as dyslexia, he is passionate about promoting inclusive technologies and assisting you in implementing universal design approaches that can benefit every student in their productivity and learning.
